HYPER-AUTOMATION SUITE OF PRODUCTS

- Automation As A Service
- Intelligent Document Processing (Structured, Semi structured and Unstructured)
- Natural Language Processing
- Document classification and preprocessing
- IDP powered translation services
- BPO Services for Human in the loop (Verification and Validation)
- Readymade integrations with enterprise applications

- Multi language support
- · End to end process workflow automation
- Low code / no code platform
- · Handwritten extraction
- · Pre trained models for industry / domain
- Data redaction capabilities
- · Cloud based and On premise offerings
- Document management system (DMS)
- Security and compliance

- Automated Process discovery
- Task mining
- Process mining
- Automated Document generation (eg. PDD from captured process / tasks)
- Automated Training material generation (similar to LMS systems)
- Automated Robot generation (from captured process/task)

CLIENTS SERVED

INTELLIGENT AUTOMATION FOR EVERYONE

EMPOWERING OUR CLIENTS

Our Mission: To Re-Imagine the Future of Efficiency and Empower Our Clients To Improve the World.

CORE TEAM PROFILE

- ✓ 20+ years of technology leadership and leading industry experience in RPA and Intelligent Automation.
- Multidisciplinary leadership and experience from core industry backgrounds.
- Certified and Advanced Developers and Architects in all leading RPA platforms of UiPath, Automation Anywhere, Abbyy Flexicapture Certified Professionals.

WHAT OUR CLIENTS SAY

"The qBotica team was instrumental in setting up our UiPath Orchestrator and has been working diligently on a few processes, one centered around capturing data from Invoices using OCR and UiPath, and the other centered around designing an end-to-end workflow that ingests and processes unique sets of documents, and provides outputs used to improve efficiencies within our organization. They've been great and have been able to solve any roadblocks we've encountered thus far."

VP, Finance, OTR Capital

INDUSTRY LEADING RECOGNITION

WHAT OUR PARTNERS SAY

"qBotica has emerged as a Star Performer and a Major Contender on Everest Group's Intelligent Document Processing (IDP) PEAK Matrix® Assessment 2022. It has enhanced the capabilities of its IDP platform, DoqumentAI, offering more flexibility in addressing various data types and document formats and greater control to enterprise users. Its investments in pre-built dashboards to monitor key operational and workforce metrics, along with its strong growth and a more diversified portfolio of clients, have also contributed to its success."

Ashwin Gopakumar, Practice Director, Everest Group

The qBotica team has always displayed a high level of professionalism and the competency to bring real life and practical suggestions. These solutions have significantly transformed how we do business both from externally facing processes to back-office operations.
